

ITIL® 4 Managing Professional (MP) Transition

COURSE DETAILS

The ITIL® 4 Managing Professional transition module is designed to allow ITIL® v3 candidates who have already invested to easily transition across to ITIL® 4. They can gain the designation of ITIL® 4 Managing Professional via one course and one exam.

The transition module enables candidates to recognise their previous achievements while still gaining the up-to-date skills and knowledge needed to navigate the digital service economy.

The module will provide information on the key elements of the following modules from ITIL® 4 Managing Professional:

- ITIL® 4 Specialist Create, Deliver and Support
- ITIL® 4 Specialist Drive Stakeholder Value
- ITIL® 4 Specialist High Velocity IT
- ITIL® 4 Strategist Direct Plan and Improve.

The course will also provide an introduction and cover the key concepts found in ITIL® 4 Foundation.

To take the transition module, all candidates must be at Expert level or have a minimum of 17 v3 credits. Candidates can continue to collect their v3 Intermediate or Practitioner credits to enable them to be eligible to take the transition module when it is launched.

The purpose of the ITIL® 4 Managing Professional Transition Qualification is:

- To allow candidates of the previous iteration of ITIL® the opportunity of a straightforward transition to ITIL® 4 in order to achieve the designation of ITIL® 4 Managing Professional
- To provide candidates with an understanding of the new ITIL® 4 Foundation concepts and definitions, including the key differences between the previous iteration of ITIL® and ITIL® 4 and how they can be practically applied
- To provide candidates with an understanding of the key elements from each one of the four ITIL® Managing Professional (MP) modules: Create, Deliver and Support, Drive Stakeholder Value, High Velocity IT and Direct, Plan and Improve, and also ITIL® 4 Foundation.

The purpose of the ITIL® 4 Managing Professional Transition Examination is:

To assess whether the candidate can demonstrate sufficient understanding and practical application of the concepts covered in the following ITIL® 4 Core publications to be awarded the designation ITIL® 4 Managing Professional:

- ITIL® 4 Foundation: to introduce readers to the management of modern IT-enabled services, to provide them with an understanding of the common language and key concepts.
- Create, Deliver and Support (CDS): to provide the candidate with an understanding on how to integrate different value streams and activities to create, deliver and support IT-enabled products and services, and relevant practices, methods and tools.
- Drive Stakeholder Value (DSV): to provide the candidate with an understanding of all types of engagement and interactions between a service provider and their customers, users, suppliers and partners, including key CX, UX and journey mapping concepts.
- High Velocity IT (HVIT): to provide the candidate with an understanding of the ways in which digital organizations and digital operating models function in high velocity environments
- Direct, Plan and Improve (DPI): to provide the candidate with the practical skills necessary to create a 'learning and improving' IT organization, with a strong and effective strategic direction.

Prerequisites:

The candidate must have the ITIL® Expert certification or have 17 credits under the ITIL® Credit scheme, wishing to develop their knowledge and application. In addition, the candidate must have attended an accredited training course for this module.

Exam:

Duration: 90 minutes

Materials permitted: This is a ‘closed book’ examination. No materials other than the examination materials are permitted.

Prerequisites:

COURSE AGENDA	
ITIL® FOUNDATION	
MODULE NAME	TOPICS
1. Understand the key concepts of service management	<ul style="list-style-type: none"> • Describe the key concepts of service relationships: <ul style="list-style-type: none"> a) Service offering b) Service relationship management c) Service provision d) Service consumption
2. Understand how the ITIL® guiding principles can help an organization adopt and adapt service management	<ul style="list-style-type: none"> • Describe the nature, use and interaction of the guiding principles • Explain the use of the guiding principles <ul style="list-style-type: none"> a) Focus on value b) Start where you are c) Progress iteratively with feedback d) Collaborate and promote visibility e) Think and work holistically f) Keep it simple and practical g) Optimize and automate
3. Understand the four dimensions of service management	<ul style="list-style-type: none"> • Describe the four dimensions of service management <ul style="list-style-type: none"> a) Organizations and people b) Information and technology c) Partners and suppliers d) Value streams and processes
4. Understand the purpose and components of the ITIL® service value system	<ul style="list-style-type: none"> • Describe the ITIL® service value system
5. Understand the activities of the service value chain, and how they interconnect	<ul style="list-style-type: none"> • Describe the interconnected nature of the service value chain and how this supports value streams • Describe the purpose of each value chain activity: <ul style="list-style-type: none"> a) Plan b) Improve c) Engage d) Design & transition e) Obtain/build f) Deliver & support

CREATE, DELIVER AND SUPPORT (CDS)

MODULE NAME	TOPICS
1. Understand how to plan and build a service value stream to create, deliver, and support services	<ul style="list-style-type: none"> • Understand the concepts and challenges relating to the following across the service value system: <ul style="list-style-type: none"> a) Organisational structure b) Collaborative culture c) Teams, roles & competencies d) Team culture and differences e) Working to a customer-orientated mindset f) Employee satisfaction management g) The value of positive communications • Know how to plan and manage resources in the service value system: <ul style="list-style-type: none"> a) Team collaboration and integration b) Workforce planning c) Results based measuring and reporting
2. Know how relevant ITIL® practices contribute to the creation, delivery and support across the SVS and value streams	<ul style="list-style-type: none"> • Know how to use a value stream to design, develop and transition new services. • Know how to use a value stream to provide user support
3. Know how to create, deliver and support services	<ul style="list-style-type: none"> • Know how to co-ordinate, prioritize and structure work and activities to create deliver and support services, including: <ul style="list-style-type: none"> a) Managing queues and backlogs b) Prioritizing work (including all subsections)

DRIVE STAKEHOLDER VALUE (DSV)

MODULE NAME	TOPICS
1. Understand how customer journeys are designed	<ul style="list-style-type: none"> • Understand the concept of the customer journey
2. Know how to foster stakeholder relationship	<ul style="list-style-type: none"> • Understand the concepts mutual readiness and maturity • Understand the different supplier and partner relationship types, and how these are managed. • Know how to develop customer relationships (including all subsections)
3. Know how to shape demand and define service offerings	<ul style="list-style-type: none"> • Understand methods for designing digital service experiences based on value driven, data driven and user centred service design. • Understand approaches for selling and procuring service offerings
4. Know how to onboard and offboard customers and users	<ul style="list-style-type: none"> • Understand key transition, onboarding and offboarding activities • Understand the ways of relating with users and fostering user relationships • Understand how users are authorized and entitled to services • Understand different approaches to mutual elevation of customer, user and service provider capabilities • Know how to prepare onboarding and offboarding plans. • Know how to develop user engagement and delivery channels

6. Know how to act together to ensure continual value co-creation (service consumption / provisioning)	<ul style="list-style-type: none"> • Understand how users can request services • Understand the concepts of customer and user • Understand methods for encouraging and managing customer and user feedback • Understand the concept of 'moments of truth'
7. Know how to realise and validate service value	<ul style="list-style-type: none"> • Understand methods for measuring service usage and customer and user experience and satisfaction • Understand methods to track and monitor service value (outcome, risk, cost and resources) • Understand different types of reporting of service outcome and performance • Understand charging mechanisms • Know how to validate service value • Know how to evaluate and improve the customer journey

HIGH VELOCITY IT (HVIT)

MODULE NAME	TOPICS
1. Understand concepts regarding the high-velocity nature of the digital enterprise, including the demand it places on IT	<ul style="list-style-type: none"> • Understand the following terms: <ol style="list-style-type: none"> a) Digital organization b) High velocity IT c) Digital transformation d) IT transformation e) Digital product f) Digital technology • Understand when the transformation to high velocity IT is desirable and feasible • Understand the five objectives associated with digital products – to achieve: <ol style="list-style-type: none"> a) Valuable investments – strategically innovative and effective application of IT b) Fast development - quick realization and delivery of IT services and IT-related products c) Resilient operations - highly resilient IT services and IT-related products d) Co-created value - effective interactions between service provider and consumer e) Assured conformance - to governance, risk and compliance (GRC) requirements
2. Understand the digital product lifecycle in terms of the ITIL® 'operating model'	<ul style="list-style-type: none"> • Understand how high velocity IT relates to: <ol style="list-style-type: none"> a) The four dimensions of service management b) The ITIL® service value system c) The service value chain d) The digital product lifecycle
3. Understand the importance of the ITIL® Guiding Principles and other fundamental concepts for delivering high velocity IT	<ul style="list-style-type: none"> • Understand the following principles, models and concepts: <ol style="list-style-type: none"> a) Ethics b) Safety culture c) Lean culture d) Toyota Kata e) Lean / Agile / Resilient / Continuous f) Service-dominant logic g) Design thinking h) Complexity thinking

<p>4. Understand the importance of the ITIL® Guiding Principles and other fundamental concepts for delivering high velocity IT</p>	<ul style="list-style-type: none"> • Know how to use the following principles, models and concepts: <ul style="list-style-type: none"> a) Ethics b) Safety culture c) Lean culture d) Toyota Kata e) Lean / Agile / Resilient / Continuous f) Service-dominant logic g) Design thinking h) Complexity thinking • To contribute to: <ul style="list-style-type: none"> a) Help get customers’ jobs done b) Trust and be trusted c) Continually raise the bar d) Accept ambiguity and uncertainty e) Commit to continual learning
---	--

DIRECT, PLAN & IMPROVE (DPI)	
MODULE NAME	TOPICS
<p>1. Understand the scope of what is to be directed and/or planned, and know how to use key principles and methods of direction and planning in that context</p>	<ul style="list-style-type: none"> • Identify the scope of control and within this: <ul style="list-style-type: none"> a) Know how to cascade objectives and requirements b) Know how to define effective policies, controls and guidelines c) Know how to place decision-making authority at the correct level.
<p>2. Understand the role of GRC and know how to integrate the principles and methods into the service value system</p>	<ul style="list-style-type: none"> • Understand the role of risk and risk management in DPI • Understand how governance impacts DPI • Know how to ensure that controls are sufficient, but not excessive.
<p>3. Understand and know how to use the key principles and methods of Communication and Organizational Change Management to direction planning and improvement</p>	<ul style="list-style-type: none"> • Understand the nature, scope and potential benefits of organizational change management, the ‘organizational change management’ practice. • Know how to use the key principles and methods of Communication & OCM <ul style="list-style-type: none"> a) Identify and manage different types of stakeholders b) Effectively communicate with and influence others c) Establish effective feedback channels
